This application is in condition for allowance except for the following formal matters:

Non-elected claims 30-35 must be cancelled for the following reason:

Newly submitted claims 30-35 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: Originally file claims included a sampling device (Bbr, example claim 1), that is driven manually (ABbr, example claims 6,7,22,29), and even includes a locking mechanism with slot (ABsp, example claims 9, 24). As the evidence claims (ABbr, claims 6, 7, 22, 29) were indicated as being allowable, that was conclusive the combination (ABbr, ABsp) is allowable only because the evidence claims were allowable. New claims 30-35 (Bsp) are directed to the subcombination. The combination is patentable distinct from the subcombination because all of the limitations of the subcombination (Bsp) are not in the combination (ABbr), and the subcombination can be carried out by a motor. A burden would exist to examiner both the combination and subcombination due to divergent subject matter. As the new subcombination claims are patentably distinct from the evidence claims (ABbr), Applicant has constructively elected the combination.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 30-35 have been withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Art Unit: 2856

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
